I am a graduate from Nanyang Polytechnic, Diploma in Digital Media Design (Interactive Media) based in Singapore. I have completed my National Service in June 2010.

I'm currently with a team from Australia specialising in travel technology as UI/UX software engineer, we are working on a B2B SaaS platform. I am a T-shaped developer with design background with 7 years of working experience focusing in the frontend development for web platform.

My daily routine of my current role involves:
- Agile working environment with team mates based in Sydney and Singapore
- Working on assigned Jira tickets on the product; code review for completed tickets
- Wireframing and design of new pages and features
- Presenting completed design to product owners

My specialties are:
Front-End Development (HTML 5, CSS3, jQuery, Javascript, Responsive CSS framework, fronend automated work flow tools like Gulp, Grunt, wireframing, prototyping)
